

Lithium-ion Battery Technology BESS Battery Energy Storage System with Rated Grid Voltage AC400V Varies Depending On Model

Our Product Introduction

for more products please visit us on batteriesback-up.com

Basic Information

- Place of Origin: China
- Brand Name: QIYUAN
- Certification: UN38.3, IEC
- Model Number: GES-215KWH
- Minimum Order Quantity: 1
- Packaging Details: Container
- Supply Ability: 200 Units/Month

Product Specification

- Dimensions: Varies Depending On Model
- Technology: Lithium-ion Battery
- Application: Energy Storage
- Weight: Varies Depending On Model
- Communication Interface: RS485, Ethernet
- Module: 51.2V 105AH
- Capacity: Varies Depending On Model
- Battery: LiFePo4 - 100Ah
- Highlight: **AC400V BESS Battery Energy Storage System, Model BESS Battery Energy Storage System**

Product Description

Product Description:

The BESS Battery Energy Storage System is a cutting-edge solution designed for industrial energy storage applications. With its advanced features and reliable performance, this system is a versatile choice for a wide range of energy storage needs. One of the key features of the BESS Battery Energy Storage System is its communication interface. Equipped with both RS485 and Ethernet interfaces, this system offers seamless connectivity and communication capabilities for efficient monitoring and control. When it comes to weight, the BESS Battery Energy Storage System offers various models with different weight specifications. This flexibility allows users to choose the right model based on their specific requirements and installation constraints. Another important aspect of the BESS Battery Energy Storage System is its power output. Depending on the model chosen, this system provides varying power output levels to meet the energy demands of different applications. Whether it's for small-scale or large-scale energy storage needs, the BESS Battery Energy Storage System has a model to suit your requirements. The module of the BESS Battery Energy Storage System features a 51.2V 105AH configuration, providing reliable and efficient energy storage capabilities. This module is designed to deliver consistent performance and long-lasting durability, making it an ideal choice for industrial battery storage systems. Energy storage is a critical component of modern energy systems, and the BESS Battery Energy Storage System excels in this area. Whether it's for grid stabilization, peak shaving, load shifting, or renewable energy integration, this system offers a comprehensive solution for energy storage needs. With its application versatility, the BESS Battery Energy Storage System is suitable for a wide range of energy storage applications. From commercial and industrial facilities to renewable energy projects, this system can be customized to meet the unique requirements of different users. In conclusion, the BESS Battery Energy Storage System stands out as a reliable and efficient solution for industrial battery storage systems. With its advanced features, flexible configurations, and robust performance, this system is a top choice for energy storage applications that demand quality, reliability, and performance.

Features:

Product Name: BESS Battery Energy Storage System
Rated Grid Voltage: AC400V
Power Output: Varies Depending On Model
Dimensions: Varies Depending On Model
Warranty: Varies Depending On Model
Module: 51.2V 105AH

Technical Parameters:

Technical Parameter	Details
Capacity	Varies Depending On Model
Rated Grid Voltage	AC400V
Shipping	Battery In The Container
Dimensions	Varies Depending On Model
Battery	LiFePo4 - 100Ah
Pcs Power	50-500KW
Operating Temperature	-10~50 Degrees Celsius
Warranty	Varies Depending On Model
Power Output	Varies Depending On Model
Module	51.2V 105AH

Applications:

QIYUAN GES-215KWH Battery Energy Storage System is a cutting-edge product designed for various commercial battery storage system applications. With its high-quality components and reliable performance, this energy storage battery is suitable for a wide range of scenarios. Whether it is used for grid stabilization, peak shaving, or renewable energy integration, the QIYUAN GES-215KWH Battery Energy Storage System from China is a versatile solution that meets the demands of modern energy storage applications. The product is certified with UN38.3 and IEC standards, ensuring its safety and quality. The minimum order quantity for the QIYUAN GES-215KWH Battery Energy Storage System is 1 unit, with packaging details in containers for easy transportation. With a supply ability of 200 units per month, customers can rely on a consistent and timely delivery of this ESS product. Operating within a temperature range of -10 to 50 degrees Celsius, this energy storage system is suitable for various environmental conditions. The warranty for the QIYUAN GES-215KWH Battery Energy Storage System varies depending on the model, providing customers with options to suit their specific needs.

As an energy storage solution, the QIYUAN GES-215KWH Battery Energy Storage System is designed to work efficiently with a rated grid voltage of AC400V. Its capacity varies depending on the model, offering flexibility for different energy storage requirements. Overall, the QIYUAN GES-215KWH Battery Energy Storage System is a reliable and high-performance product that is ideal for commercial battery storage system applications. Its versatility, quality, and performance make it a top choice for businesses looking to optimize their energy storage needs.

Customization:

Product Customization Services for the BESS Battery Energy Storage System: -----
Brand Name: QIYUAN
Model Number: GES-215KWH
Place of Origin: China
Certification: UN38.3, IEC
Minimum Order Quantity: 1
Packaging Details: Container
Supply Ability: 200 Units/Month
Power Output: Varies Depending On Model
Dimensions: Varies Depending On Model
Pcs Power: 50-500KW
Communication Interface: RS485, Ethernet
Shipping: Battery In The Container

Support and Services:

The Product Technical Support and Services for the BESS Battery Energy Storage System include: -----
- 24/7 technical support hotline for immediate assistance with any product-related issues or questions.
- On-site installation and commissioning services ensuring proper setup and functionality of the BESS system.
- Regular maintenance and monitoring services to optimize the performance and lifespan of the BESS system.
- Training programs for customers and technicians to enhance understanding and proficiency in operating the BESS system.

Packing and Shipping:

Product Packaging: -----
The BESS Battery Energy Storage System is carefully packaged to ensure safe delivery to our customers. Each component is securely wrapped and cushioned to prevent any damage during transportation.
Shipping:
We offer fast and reliable shipping services for the BESS Battery Energy Storage System. Once your order is placed, our team will process it promptly and arrange for its delivery to your specified address. You can track your shipment to stay updated on its status.
